

## Best out of waste

**MDVM School** keeps striving to do better out of the resources available. Even in this situation of pandemic, we tried to explore the ways to stimulate inner creative essence of children. We experimented to have online activities. Going with thought, we conducted a ‘Best out of waste’ activity for class 5 children. In this activity children were supposed to make articles out of the waste material during live session.

The creativity and enthusiasm of children was found matchless. Independently, children made so beautiful and useful items. Our art and craft teacher, group in charge teacher and the subject teacher were the judges. Indeed it was a difficult task for them to select a few as the best ones. Vice Principal motivated children with her words of encouragement.

We congratulate and thank all the children participated and the parents who witnessed the event.

We will keep looking to organize such kind of events. Your support and cooperation is solicited.

Let's pray to God for this Pandemic to get over soon.
